Welcome.

Due to my long lasting experience in crafting reeds for oboe and due to my enduring cooperation with pipemaker Andreas Rogge, I am a reliable associate regarding reeds and other material for oboe and pipes.

I personally pay highest attention on the choice of wood and high-class manufacture. It is my goal to include latest findings and experience to be responsive to my customers needs.

Of course special wishes regarding wood length, inner diameter, planing strength can be provided - in special cases this can lead to a minimum purchase size. Please feel free to ask.

Your orders will be done fast, competent and with high quality. Machines and appliances - mostly custom made - complement the know-how and the instinct that are necessary for a constant quality provided. The preservative impregnation we use is stabilizing the woods moisture fluctuation and is completely safe to use, of course and represents no health hazard.
